Introduction

The field of Biochemistry focuses on biological sciences at chemical and molecular levels. A Biochemistry Master's program focuses on a curriculum which is an excellent blend of courses designed to study the biology of all living organisms, chemical and molecular basis of the building blocks of life, biological process, cycles and reactions taking place in living cells and their regulations. This exciting field also explores the interactions between biological molecules at cellular, organelle, and organism levels under normal conditions as well as during stress and disease.

The M.Phil Biochemistry degree program of PMAS-AAUR was initiated in 2006 under the Department of Biochemistry and from 2013 onwards is being run under the University Institute of Biochemistry and Biotechnology (UIBB). The UIBB institute has four main academic branches; Biochemistry, Biotechnology, Bioinformatics, and Microbiology with six broad research domains;

1. Animal Biochemistry and Biotechnology
2. Enzymology and Industrial Biotechnology
3. Plant Biochemistry and Biotechnology
4. General Biochemistry
5. Bioinformatics
6. Microbiology

Keeping with the importance of this field blended with the academic/research strengths and diversity of UIBB, M.Phil Biochemistry has gained good reputation being a highly competitive and demanding degree program of PMAS-AAUR. The curriculum for M.Phil Biochemistry program is designed based on international standards with highly competitive, advanced theoretical courses, seminars, special problem, and thesis. The curriculum follows the guidelines of Higher Education Commission (HEC), Islamabad. The courses are designed to provide updated knowledge of theoretical and practical aspects of biochemistry and allied disciplines especially molecular biology, biotechnology and genetic engineering with special focus on research and development. Seminars and Special Problem which aim at strengthening skills like presentation, scientific problems identification, literature review and writing. During research work, the students are trained in literature review search, synopsis write-up, laboratory-based experiments, data analysis and interpretation of scientific findings, thesis write-up, research manuscripts for journal publications. The M.Phil Biochemistry programs provides students an interdisciplinary knowledge at both theoretical and practical levels preparing them for careers in teaching, research, health/ medicine, biotechnology etc and continuation of studies at doctoral level

SECTION 1:

Components of Self-Assessment Process:

This Self-Assessment Report has been prepared on the basis of following eight criteria as described in Self-Assessment Manual.

Criterion-1: Program Mission, Objectives and Outcomes

Mission Statement of the Program M.PhilBiochemistry:

To train young scientists in diverse research fields of Biochemistry.

Standard 1-1: Documented Measurable Objectives

- 1. To train graduates with advanced theoretical and practical skills of biochemistry
- 2. To provide hands-on training on advanced Biochemistry/Molecular Biology techniques
- 3. To train future manpower with a career in higher education, research, teaching, industry

Expected Outcomes

- 1. Young trained scientists with a strong background in theoretical/practical biochemistry.
- 2. Graduates with skills to carryout advanced Biochemistry/Molecular Biology techniques independently.
- 3. Highly competent young scholars to work in higher education institutions, industry R&D.

Main Elements of Strategic Plan to Achieve Mission and Objectives

- 1. Goal oriented and competitive research projects with reports and theses.
- 2. Well-equipped, specialized research laboratories.
- 3. A sound teaching systemfor the award of degrees based on the experience and vision gathered from world reviews, literature, innovations, proceedings, and symposia etc
- 4. Publication of scientific papers, books, manuals etc.
- 5. Regular upgradation of curricula with focus on strong scientific core in specialized areas.
- 6. Uninterrupted research funding by the universities and other agencies.
- 7. Actice collaborations with national & international research organizations.

TABLE-1: PROGRAM OBJECTIVES ASSESSMENT

S. #	Objective	How Measured	When Measured	Improvement Identified	Improvement made
1	To train graduates with advanced theoretical and practical skills of biochemistry	Exam papers, presentations, assignment, synopsis and thesis evaluation	At the time of exams, seminars, synopsis & thesis write-up &defenseevaluation	Strong scientific basics, writing & presentation skills	Students efficiently work as teacher assistants, prepare seminars and manuscripts from their synopsis and thesis research
2	To provide hands-on training on advanced Biochemistry/Molecular Biology techniques	Prerequisite information and status of knowledge of researchers and students, through entry tests and student feed back	During and after the completion of thesis research	Knowledge/hands on training of latest Biochemistry techniques	Scientifically sound seminars delivery, laboratory experiments, thesis and publications
3	To train future manpower with a career in higher education, research, teaching, industry	Assessing interest of studentsvia seminars, synopsis/thesis defense	During regular meetings with supervisor/seniors, seminars, discussions or scientific events	Knowledge/awarence about latest trends in Biocemistry education, research and careers	Communication skills development

TABLE-2 STANDARD 1-2: OBJECTIVES VS OUTCOMES

	Objectives			
	Sr. No.	1	2	3
Outcomes	1	+++	++	+++
	2	+++	+++	++
	3	+++	+++	+++

Key: ++ = Relevant
 +++ = Highly Relevant

The program outcomes are fully supportive to program objectives mentioned above. Outcomes are based on actual details obtained from department documents.

Program Assessment Results:

It is important for student progress to be consistently evaluated and reported in relation to curricular outcomes. Information derived from the fair assessment and evaluation of students provides valuable information on the student success in relation to curriculum expectations and identifies areas of strength and challenges at the student, department and university level. At the same time, it is also important to get the feedback from the students in the form of course/instructor assessment. These assessments via performa no 1 and 10 (as per PMAS-AAUR rules) serves as an overarching framework that provides a way to structure, evaluate and improve the learning experience of our students across all programs being offered by the Institute.

The 5th SAR for M.Phil program assessment is divided into four sections;

- 1. Assessment results of Fall, 2014
- 2. Assessment results of Spring, 2015
- 3. Assessment results of Fall, 2015
- 4. Assessment results of Spring, 2016

Each assessment covers a semester and is further divided into two sections, which deals with performa no 1 and 10, respectively.

Teachers Evaluation Fall Semester 2014

Overall Results of Performa 10 of Teacher 1to 6

The teachers were evaluated by the students at the end of the semester in accordance with Proforma-10. In the graph teachers are represented as 1and 2 instead of mentioning their names. Results and performance of individual teachers will follow.

Results of Performa 10 of teacher 1(BCH-718 M section A)

The strongest point which students like about teacher 1 is that he provides additional material apart from textbook.

Results of Performa 10 of teacher 1 (BCH-718 M section A)

According to students, teacher 1 completed the course contents in time, leaves the class on time and he was not biased in exams.

Results of Performa 10 of teacher 1(BCH-718 M section B)

The strongest point which students like about teacher 1 is that he created conducive learning environment in the class and he encouraged students for asking questions about subject.

Results of Performa 10 of teacher 1 (BIOT-720 M section A)

The strongest point which students like about teacher 1 is that the instructor created conducive environment for learning and he was well prepared for the class.

Results of Performa 10 of teacher 2 (BCH-720 M section A)

According to result of performa 10, the teacher 2 was punctual, well prepared for the class and the provided material was modern and up to date.

Results of Performa 10 of teacher 2 (BCH-734 E section A)

The strongest point which students like about teacher 2 is that he was well prepared for class, leaves the class in time and exam was conducted fairly.

Results of Performa 10 of teacher 2 (BCH-734 M section A)

The results of performa 10 shows that the instructor provided the course split schedule during first week of semester

Results of Performa 10 of teacher 2 (BCH-734 M section B)

The strongest point which students like about teacher 2 is that the instructor created conducive environment for learning and he was well prepared for the class

Results of Performa 10 of teacher 3 (BCH-720-I E section A)

The strongest point which students like about teacher 3 is that the instructor created conducive environment for learning and he was well prepared for the class.

Results of Performa 10 of teacher 3 (BCH-720-I M section A)

The results of performa 10 shows that the instructor provided the course split schedule during first week of semester.

Results of Performa 10 of teacher 3 (BCH-735 E section A)

The strongest point which students like about teacher 3 is that the instructor created conducive environment for learning and he was well prepared for the class

Results of Performa 10 of teacher 3 (BCH-735 M section B)

The strongest point which students like about teacher 3 is that the instructor created conducive environment for learning and he was well prepared for the class

Results of Performa 10 of teacher 3 (BCH-735 M section A)

The results of performa 10 shows that the instructor provided the course split schedule during first week of semester.

Results of Performa 10 of teacher 4 (BCH-732 M section A)

The results of performa 10 shows that the instructor provided the course split schedule during first week of semester.

Results of Performa 10 of teacher 4 (BCH-732 M section C)

The strongest point which students like about teacher 4 is that the instructor created conducive environment for learning and he was well prepared for the class

Results of Performa 10 of teacher 5 (BIOT- 702 M section A)

The strongest point which students like about teacher 5 is that the communicates the subject matter effectively.

Results of Performa 10 of teacher 6 (BIOT- 703 M section A)

The performa 1 of teacher 2 shows the excellent performance. The pace of the course was smooth, classrooms were satisfactory, and the course material was interesting which stimulated the students’ interest in the class.

Student Course Evaluation Fall Semester 2014:**Over all Results of Proforma No. 1 Teacher 1 to 6**

Performa No. 1, deals with study of course observation regarding design of course contents (both theoretical and practical), its relevance with subject and teaching material. It also emphasizes on instructor's role in, not only completing course within given time frame, but how instructor developed student's interest in this course, used updated literature and was fair in evaluation at the end of a study course.

Results of Performa 1 of teacher 1(BCH-718 M section A)

Depending upon the results of performa 1, students participated in course and pace of course was appropriate.

Results of Performa 1 of teacher 1 (BCH-718 M section B)

The performa 1 shows that the overall result of the course is good in terms of students’ punctuality and all the objectives were achieved.

Results of Performa 1 of teacher 1 (BIOT-720 M section A)

Depending upon the results of performa 1, students participated in course and pace of course was appropriate.

Results of Performa 1 of teacher 2 (BCH-720 M section A)

Depending upon the results of performa 1, students participated actively in the course and they were punctual.

Results of Performa 1 of teacher 2(BCH-734 E section A)

The performa 1 of teacher 2 shows the excellent performance. The pace of the course was smooth, classrooms were satisfactory, and the course material was interesting which stimulated the students’ interest in the class.

Results of Performa 1 of teacher 2(BCH-734 M section A)

The strongest point of the course is that its objectives were clear and practical material was useful.

Results of Performa 1 of teacher 2 (BCH 734 M section B)

The results of performa 1 of teacher 3 are satisfactory. The method of assessment were reasonable.

Results of Performa 1 of teacher 3 (BCH-720-I E section A)

Depending upon the result of performa 1, students participated actively in the class and overall environment was good.

Results of Performa 1 of teacher 3 (BCH-720-I M section A)

Depending upon the result of performa 1, students participated actively and understood the course.

Results of Performa 1 of teacher 3 (BCH-735 M section B)

Depending upon the result of performa 1, students participated actively in the class and classrooms were satisfactory.

Results of Performa 1 of teacher 3 (BCH-735 E section A)

Depending upon the result of performa 1, students participated actively in the class and overall environment was good.

Results of Performa 1 of teacher 3 (BCH-735 M section A)

Depending upon the result of performa 1, course objectives were clear students participated actively in the class.

Results of Performa 1 of teacher 4 (BCH-732 M section C)

The strongest point which students like about teacher 4 is that the instructor presented the concepts very clearly.

Results of Performa 1 of teacher 4 (BCH-732 M section A)

The strongest point which students like about teacher 4 is that the instructor participated actively in class and course objectives were clear.

Results of Performa 1 of teacher 5 (BIOT-702 M section A)

The strongest point which students like about teacher 4 is that the instructor dealt with their problems effectively.

Results of Performa 1 of teacher 6 (BIOT-703 M section A)

The strongest pont was that the class rooms were satisfactory, course workload was manageable and material was well organized and presented.

Program Assessment Results:**Teachers Evaluation Spring Semester 2015****Overall Results of Performa 10 of Teacher 1 to 7**

The teachers were evaluated by the students at the end of the semester in accordance with Proforma-10. In the graph teachers are represented as 1, 2, 3..., instead of mentioning their names. Results and performance of individual teachers will follow.

Results of Performa 10 of Teacher 1(BCH-719 E section C)

The strongest point which students like about teacher 1 is that the instructor has provided course split schedule during first week and course was modern and update.

Results of Performa 10 of Teacher 1(BCH-719 M section C)

The strongest point which students like about teacher 1 was his/her availability during and after office hours for student matters and prepared well for the class.

Results of Performa 10 of Teacher 1 (BCH-720 –I M section A)

The strongest point which students like about teacher 1 is that the instructor provided course split schedule at start of semester and demonstrated knowledge of subject and leaves at time.

Results of Performa 10 of Teacher 1 (BCH-720-II M section A)

The strongest point which students like about teacher 1 is that the instructor was prepared for the class and he provided course split schedule at start of semester.

Results of Performa 10 of Teacher 1 (BIOT-719 M section D)

The strongest point which students like about teacher 1 is that the instructor provided course split schedule at start of semester and demonstrated knowledge of subject and leaves at time.

Results of Performa 10 of Teacher 1 (BIOT-720 M section A)

Depending upon the result of performa, students participated actively in the class and overall environment was good.

Results of Performa 10 of Teacher 2 (BCH-719 M section B)

The strongest point which students like about teacher 2 is that instructor provided course split schedule at start of semester and returned graded papers on time.

Results of Performa 10 of Teacher 3 (BCH-719 E section F)

The strongest point which students like about teacher 3 is that the course content is provided in time and the demonstration of the subject knowledge is good.

Results of Performa 10 of Teacher 3 (BCH-719 m section F)

The strongest point which students like about teacher 3 is that the course content is provided in time and the demonstration of the subject knowledge is good.

Results of Performa 10 of Teacher 3 (BIOT-719 M section B)

The strongest point which students like about teacher 4 is that the course content is provided in time and he communicated subject matter effectively.

Results of Performa 10 of Teacher 4 (BCH-719 E section A)

The strongest point which students like about teacher 4 is that the instructor arrives on time and is fair in examinations.

Results of Performa 10 of Teacher 4 (BCH-719 M section A)

The strongest point which students like about teacher 4 is that the course content is provided in time and he communicated subject matter effectively.

Results of Performa 10 of Teacher 4 (BCH-720-II E section A)

The strongest point which students like about teacher 4 is that he is punctual and fair in examinations.

Results of Performa 10 of Teacher 4 (BCH-720-II M section A)

The strongest point which students like about teacher 2 is that the course content was modern and updated.

Results of Performa 10 of Teacher 5 (BCH-719 E section E)

The strongest point which students like about teacher 5 is that the course content is provided in time and the provided material and examination was well balanced.

Results of Performa 10 of Teacher 5 (BCH-719 M section E)

The strongest point which students like about teacher 3 is that the course related provided material and examination was well balanced. And instructor was available for the after class consultations also.

Results of Performa 10 of Teacher 5 (BCH-733 M section A)

The strongest point which students like about teacher 5 is that the instructor was punctual; course related information was provided in time. Instructor was available for the after class consultations also.

Results of Performa 10 of Teacher 5 (BIOT-719 M section A)

The strongest point which students like about teacher 5 is that the instructor was punctual; course related information was provided in time. Instructor was available for the after class consultations also.

Results of Performa 10 of Teacher 5 (BCH-733 M section B)

The strongest point which students like about teacher 3 is that the instructor was punctual about timings, and the knowledge demonstration of the subject was good.

Results of Performa 10 of Teacher 6 (BCH-719 E section G)

The strongest point which students like about teacher 6 is that the course material was modern updated and well communicated. Instructor communicated subject matter effectively and he was available after class consultations also.

Results of Performa 10 of Teacher 7 (BIOT 706 M section A)

The strongest point was that the course material was updated and modern and instructor leaves on time.

Results of Performa 10 of Teacher 7 (BIOT-707 M section A)

The strongest point was instructor was punctual and delivered the lectures effectively.

Results of Performa 10 of Teacher 7 (BIOT-719 M section C)

The results of performa 10 shows instructor 7 was well prepared for each class and encouraged students participation in class room.

Student Course Evaluation Spring Semester 2015:**Over all Results of Proforma No. 1 Teacher 1 to 7**

Performa No. 1, deals with study of course observation regarding design of course contents (both theoretical and practical), its relevance with subject and teaching material. It also emphasizes on instructor's role in, not only completing course within given time frame, but how' instructor developed student's interest in this course, used updated literature and was fair in evaluation at the end of a study course.

Results of Performa 1 of Teacher 1 (BCH-719 E section F)

The strongest point which students like about teacher 1 is that the course objectives were very clear, material provided for course was well balanced and presented very well.

Results of Performa 1 of Teacher 1 (BCH-719 M section F)

The strongest point which students like about teacher 1 is that the course pace was appropriate and the course content also kept the interest of the students.

Results of Performa 1 of Teacher 1 (BIOT-719 M section B)

The strongest point which students like about teacher 1 is that the course objectives were very clear, material provided for course was well balanced and presented very well.

Results of Performa 1 of Teacher 2 (BCH-719 E section A)

The strongest point which students like about teacher 2 is that the course objectives were clear. Teacher was punctual and maintained a good learning environment.

Results of Performa 1 of Teacher 2 (BCH-719 M section A)

The strongest point which students like about teacher 2 is that the course objectives were clear and the teaching methodology was good.

Results of Performa 1 of Teacher 2 (BCH-720-II E section A)

The strongest point which students like about teacher 2 is that the course objectives were clear and the material provided was appropriate.

Results of Performa 1 of Teacher 2 (BCH-720- II M section A)

The strongest point which students like about teacher 2 is that the feedback on assessment was timely and learning material provided was useful.

Results of Performa 1 of Teacher 3 (BCH-719 E section C)

The strongest point which students like about teacher 3 is that the course concepts were presented very clearly. The material provided was appropriate and a good learning environment was created in class.

Results of Performa 1 of Teacher 3 (BCH-719 M section C)

The strongest point which students like about teacher 3 is that the course workload was manageable and material in tutorials was useful.

Results of Performa 1 of Teacher 3 (BCH-720 M section A)

The strongest point which students like about teacher 3 is that the subject material was well presented and the communication with the students was very good.

Results of Performa 1 of Teacher 3 (BCH-720-II M section A)

The strongest point which students like about teacher 3 is that the course objectives were clear and students participated actively in classroom.

Results of Performa 1 of Teacher 3 (BIOT-719 M section D)

The strongest point which students like about teacher 3 is that the course objectives were very clear, material provided for course was well balanced and presented very well.

Results of Performa 1 of Teacher 3 (BIOT-720 M section A)

The strongest point which students like about teacher 3 is that the course objectives were very clear, material provided for course was well balanced and presented very well.

Results of Performa 1 of Teacher 4 (BCH-719 E section E)

The strongest point which students like about teacher 4 is that the course objectives were clear and classrooms were satisfactory.

Results of Performa 1 of Teacher 4 (BCH-719 M section E)

The strongest point which students like about teacher 4 is that the lectures were well presented. The course objectives were clear and the material provided was appropriate and communicated well.

Results of Performa 1 of Teacher 4 (BIOT-719 M section A)

The strongest point which students like about teacher 4 is that instructor did his job very well, the course objectives were clear which encouraged students interest and classrooms were satisfactory.

Results of Performa 1 of Teacher 4 (BCH-733 M section A)

The strongest point which students like about teacher 4 is that the course objectives were very clear and the instructor was regular throughout the course.

Results of Performa 1 of Teacher 4 (BCH-733 M section B)

The strongest point which students like about teacher 4 is that the course material was relevant and useful and overall there was a good learning environment.

Results of Performa 1 of Teacher 5 (BCH-719 E section G)

The strongest point which students like about teacher 5 is that the course concepts were presented very clearly and the course stimulated the student's interest.

Results of Performa 1 of Teacher 6 (BCH-719 M section B)

The strongest point which students like about teacher 6 is that the course objectives were very clear and the course stimulated the interest of students on the subject area.

Results of Performa 1 of Teacher 7 (BIOT-706 M section A)

Depending on results of performa 1, teacher 7 well presented the course material and kept the pace of course appropriate.

Results of Performa 1 of Teacher 7 (BIOT-707 M section A)

The strongest point was the class rooms were satisfactory and material in practicals was useful.

Results of Performa 1 of Teacher 7 (BIOT-719 M section C)

The strongest point which students like about teacher 4 is that the course material was relevant and useful and overall there was a good learning environment.

Results of Performa 1 of Teacher 7 (BIOT-720 M section A)

The strongest point which students like about teacher 7 is that the course objectives were very clear, material provided for course was well balanced and presented very well.

Teachers Evaluation Fall Semester 2015

Overall Results of Performa 10 of Teacher 1-4

The teachers were evaluated by the students at the end of the semester in accordance with Proforma-10. In the graph teachers are represented as 1, 2, 3 instead of mentioning their names. Results and performance of individual teachers will follow.

Results of Performa 10 of Teacher 1(BCH-718 M section A)

The strongest point which students like about teacher 1 is that the instructor communicates subject material very effectively and maintains a quality learning environment and gave practical life examples.

Results of Performa 10 of Teacher 2 (BCH-720 M section A)

The strongest point which students like about teacher 2 is that the instructor develops a good concept of the subject and was fair in examinations

Results of Performa 10 of Teacher 3 (BCH-732 M section A)

The strongest point which students like about teacher 3 is that the instructor was well prepared and fair in examinations.

Results of Performa 10 of Teacher 3 (BCH-735 M section A)

The strongest point which students like about teacher 3 is that the instructor shows respect towards students and encourage class participation.

Results of Performa 10 of Teacher 4 (BIOT-716 M section A)

The strongest point which students like about teacher 4 is that the instructor communicates the subject effectively.

Results of Performa 10 of Teacher 4 (BIOT-720 M section A)

The performa 1 shows that the overall result of the course is good in terms of students' punctuality and all the objectives were achieved.

Student Course Evaluation Fall Semester 2015:**Over all Results of Proforma No. 1 Teacher 1-4**

Performa No. 1, deals with study of course observation regarding design of course contents (both theoretical and practical), its relevance with subject and teaching material. It also emphasizes on instructor's role in, not only completing course within given time frame, but how' instructor developed student's interest in this course, used updated literature and was fair in evaluation at the end of a study course.

Results of Performa 1 of Teacher 1(BCH-718 M section A)

The strongest point which students like about teacher 1 is that, overall the instructor has done a good job in handling the course and students related matters.

Results of Performa 1 of Teacher 2 (BCH-720 M section A)

The strongest point which students like about teacher 2 is that learning material was useful.

Results of Performa 1 of Teacher 3 (BCH-732 M section A)

The strongest point which students like about teacher 2 is that, overall the instructor handled the entire course and students related matters.

Results of Performa 1 of Teacher 3 (BCH-735 M section A)

The strongest point which students like about teacher 3 is that practical material was useful and classrooms were satisfactory.

Results of Performa 1 of Teacher 4 (BIOT-716 M section A)

The strongest point was the material in practical was useful and assessment method was reasonable.

Results of Performa 1 of Teacher 4 (BIOT-720 M section A)

The strongest point which students like about teacher 4 is that the instructor created conducive environment for learning and he was well prepared for the class.

Teachers Evaluation Spring Semester 2016

Overall Results of Performa 10 of Teacher 1, 2, 3, 4, 5 ,6, 7and 8.

The teachers were evaluated by the students at the end of the semester in accordance with Proforma-10. In the graph teachers are represented as 1, 2, 3..., and 6 instead of mentioning their names.

Results of Performa 10 of teacher 1 (BCH-714 M section A)

The strongest point which students like about teacher 1 is that the course material is modern and updated and the teacher is very punctual and well prepared for the class.

Results of Performa 10 of teacher 1(BCH-719 Msection C)

The strongest point of teacher 1 is that he is punctual and well prepared for the class and he provided all the essential materials of the course.

Results of Performa 10 of teacher 1(BCH-720 M section A)

According to students teacher 1 communicated subject matter effectively and encouraged class participation.

Results of Performa 10 of teacher 2(BIOT-719 M section B)

The strongest point which students like about teacher 2 is that, overall instructor did a very good job related to all the aspects of course the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 10 of teacher 2(BCH-719 M section B)

The strongest points of teacher 2 is that the instructor is fair in examinations and increased the knowledge of the students.

Results of Performa 10 of teacher 3 (BCH-719 M section F)

The best point of teacher 3 is that he was punctual, taught the updated and modern concepts of the course, which integrated the theoretical concepts with the real world application

Results of Performa 10 of teacher 3 (BIOT-736 M section F)

The strongest point which students like about teacher 3 is that, overall instructor did a very good job related to all the aspects of course the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 10 of teacher 3 (BCH-736 M section A)

The strongest point of teacher 3 is that the instructor was fair in exams and maintained environment conducive to learning.

Results of Performa 10 of teacher 4 (BCH-719 M section G)

Teacher Evaluation Graph

The strongest point which students like about teacher 4 is that the course material is modern and updated and the teacher is very punctual and well prepared for the class

Results of Performa 10 of teacher 4(BIOT-719 M section G)

The strongest point which students like about teacher 4 is that the course related information was provided in time and the instructor was well prepared for class and syllabus was well structured.

Results of Performa 10 of teacher 4(BIOT-706 M section A)

The strongest point which students like about teacher 4 is that the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 10 of teacher 4(BCH-720 M section A)

The strongest point which students like about teacher 4 is that overall he did an excellent job and he maintained an environment that is conducive to learning.

Results of Performa 10 of teacher 4 (BCH-737 M section A)

According to students teacher 4 communicates the subject matter effectively.

Results of Performa 10 of teacher 5 (BCH-719 M section G)

The strongest point which students like about teacher 5 is that he is very fair in examination, encouraged class participation and course material is modern and updated.

Results of Performa 10 of teacher 5 (BIOT-701 M section A)

The strongest point which students like about teacher 6 is that the course related information was provided in time and the instructor was well prepared for class.

Results of Performa 10 of teacher 6 (BCH-719 M section E)

The strongest point which students like about teacher 6 is that the instructor is punctual and well prepared for the class and provided course material on time.

Results of Performa 10 of teacher 7 (BCH-719 M section D)

The teacher 7 demonstrated the knowledge of the course well and provided the course split schedule during the first week of the semester

Results of Performa 10 of teacher 7 (BCH-733 M Section A)

The strongest point which students like about teacher 7 is that the teacher was punctual and available in office during the specified hours.

Results of Performa 10 of teacher 7 (BIOT-720 M Section A)

The strongest point which students like about teacher 7 is that, overall instructor did a very good job related to all the aspects of course the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 10 of teacher 8 (BIOT-719 M Section A)

The strongest point which students like about teacher 8 is that the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Student Course Evaluation Spring Semester 2016:**Over all Results of Proforma No. 1 Teacher 1, 2, 3, 4, 5,6, 7 and 8.**

Performa No. 1, deals with study of course observation regarding design of course contents (both theoretical and practical), its relevance with subject and teaching material. It also emphasizes on instructor's role in, not only completing course within given time frame, but how' instructor developed student's interest in this course, used updated literature and was fair in evaluation at the end of a study course.

Results of Performa 1 of teacher 1(BCH-714 M section A)

According to students the course material was well organized and feedback on assessment were timely.

Results of Performa 1 of teacher 1(BCH-719 M section C)

The strongest point which students like about the course is that the course objectives were clear and the demonstrator dealt with students' problem effectively.

Results of Performa 1 of teacher 1(BCH-720 M section A)

Depending upon the results of performa 1, the course objectives were clear and feedback on assessment were timely.

Results of Performa 1 of teacher 2 (BCH-719 M section B)

The results of performa 1 shows that the course material was useful and objectives were clear.

Results of Performa 1 of teacher 2 (BIOT-719 M section B)

The strongest point which students like about teacher 7 is that, overall instructor did a very good job related to all the aspects of course the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 1 of teacher 3 (BCH-719 M section F)

According to performa 1 result the ideas and concepts were presented clearly and students made progress in the course.

Results of Performa 1 of teacher 3(BCH-736 M section A)

Depending upon the results of performa 1, the learning resources in the library were appropriate and course was well structured to achieve the learning outcomes.

Results of Performa 1 of teacher 3 (BIOT-719 M section F)

The strongest point which students like about teacher 6 is that the course related information was provided in time and the instructor was well prepared for class.

Results of Performa 1 of teacher 4 (BCH-719 M section G)

The results of performa 1 clearly indicates that the course workload was manageable and the expected outcomes were well achieved.

Results of Performa 1 of teacher 4 (BCH-720 M section A)

Depending upon the results of performa 1 the materials in the course were useful and students understand it easily.

Results of Performa 1 of teacher 4 (BCH-737 M section A)

Depending upon the results of performa 1, the class environment was conducive to learning and practical material provided was useful.

Results of Performa 1 of teacher 4 (BIOT-719 M section G)

The strongest point which students like about teacher 4 is that, overall instructor did a very good job related to all the aspects of course the course related information was provided in time and the instructor was well prepared for class and was available for after class consultations as well.

Results of Performa 1 of teacher 4 (BIOT-706 M section A)

The strongest point which students like about teacher 4 is that the course related information was provided in time and the instructor was well prepared for class.

Results of Performa 1 of teacher 5 (BCH-719 M section H)

Depending upon the results of performa 1, the course stimulated the students' interest and their participation and the instructor dealt with their problems effectively.

Results of Performa 1 of teacher 5 (BIOT-701 M section A)

The strongest point which students like about teacher 5 is that the instructor demonstrates the knowledge of the subject very well and course related information was provided in time.

Results of Performa 1 of teacher 6 (BCH-719 M section E)

According to results of performa 1, the course objectives were clear and the materials were well organized and presented.

Results of Performa 1 of teacher 7 (BCH-719 M section D)

Depending upon the results of performa 1, the instructor was very cooperative and dealt with students need and problems.

Results of Performa 1 of teacher 7 (BCH-733 M Section A)

Depending upon the results of performa , the assessment of the course is well in terms of teaching and learning and students participated in the classroom effectively.

Results of Performa 1 of teacher 7 (BIOT- 720 M section A)

The strongest point which students like about teacher 7 is that the objectives of course were clear and the communication with the students was very good.

Results of Performa 1 of teacher 8 (BIOT- 719 M section A)

The strongest point which students like about teacher 8 is that the course objectives were made very clear to students, students were punctual and actively participated in the class and the concepts of the subject were well understood by the students.

Skills and Capabilities Reflected in Performance as M.Phil Biochemistry:

Students develop ability to inter-relate the theoretical knowledge with practical aspects of Biochemistry which will help them to work as professional biochemists in various job sectors, to build confidence and communicate effectively in writing, oral and demonstration by using modern tools, techniques and skills for their profession, to formulate and design the experiments/project and to work effectively in a team, to manage different problems and imbibe ability to recognize future needs in the field of Biochemistry which will also contribute in the development of nation.

Standard 1-3**Strength of the Institute/Department:**

The University Institute of Biochemistry and Biotechnology (UIBB) aims to excel in advanced research in Biochemistry, Molecular Biology and Biotechnology to provide means in controlling various diseases related to plant, animal and human as well as to enhance agriculture and livestock productivity with particular emphasis to high priority areas related to Pakistan's economic growth.

The institute has state of the art, fully equipped laboratories with latest instruments/chemicals including Multiplex, PCR thermocyclers, DNA nanodrops, RT-PCR, Gel-documentation systems, Bioplastics, HPLC, GC, Fluorescence microscope, Fermenters, Plant tissue culture/cell culture chambers, ultra-low freezers, and all basic laboratory equipments like horizontal and vertical gel electrophoresis systems, centrifuges, spectrophotometers, shaker/incubators, safety cabinets, pH meters, laboratory etc. However, the main strength of UIBB is its highly qualified and skilled faculty, with full acquaintance of their respective subjects including Animal Biochemistry/ Biotechnology, Enzymology and Industrial Biotechnology, Epigenetics, Human molecular genetics, Human/Animal nutrition, Infectious disease genetics, Molecular diagnostics, Nano-biotechnology, Phytochemistry, Plant Biochemistry and Biotechnology, etc. which covers all aspects of Biochemistry, Molecular Biology and Biotechnology. All of faculty members of UIBB are highly competitive academic manpower of PMAS-AAUR. They have successfully completed number of National/International research projects and are remarkably active in their academic and research fields.

Weakness Identified in the Program:

Although the faculty and laboratories are outstanding for producing quality graduates but they are not sufficient. Although the Department of Biochemistry has been upgraded to University Institute of Biochemistry and Biotechnology (UIBB), promotion of existing faculty members, recruitment of faculty members against already existing posts, approval of new budgetary posts, and upgradation of existing is still awaited. Due to above mentioned scenario existing faculty is over-burdened with heavy teaching workload along with routine assignments specially admissions, setting-up of timetable and date-sheet, and preparation of SARs. Another important issue is lack of full time qualified technicians/supporting staff. Therefore, scientific research activities (both personal research projects as well as student theses projects) are being handicapped. Besides, access to scientific literature has also been inconsistent due to regular problems in internet. Above all, the institute is under extensive financial constraints due to limited annual budget compared to the seven degree programs being offered with increasing student enrollments and compulsory courses offered to other faculties/institutes/departments in the university.

Major Future Improvement Plans:

- Increase in the allocated budget for UIBB as per demands of degree programs being offered, number of enrolled students, and routine academic and official matters.
- Induction of new faculty members and upgradation/promotions of existing faculty members of Biochemistry.
- Induction of trained laboratory assistants and associated for handling routine work in general laboratories located in UIBB.
- Strengthening of the existing facilities and infra-structure of general laboratories in UIBB for under-graduate and graduate level degree programs.

TABLE-3: QUANTITATIVE ASSESSMENT OF UIBB (2014-2016)

Sr. #	Particular	No.	Remarks
I	BS produced	NA	No data as no graduates produced yet
II	M.Sc produced	157	Graduates working in public/private sectors of research, teaching, diagnostics, pharmaceuticals, chemical and equipment supplies. Many ex-students have joined M.Phil. & Ph.D. studies in PMAS-AAUR, QAU, PU & UAF
III	M.Phil	102	Working in public/private sectors of research, teaching, diagnostics, pharmaceuticals, chemical and equipment supplies. Many ex-students have pursued PhD nationally/internationally.
IV	Ph.D.	11	In employment
V	– Post-Doc fellowship faculty – Short Term Training	5 3	USA, UK, Sweden, Canada
VI	Students: Faculty ratio	25:1	
VII	Technical: Non Technical ratio	2:8	

Faculty**Table-3.1: Faculty Distribution in UIBB**

Name	Position	Qualification	Specialization
Dr.S.M.Saqan Naqvi	Professor	Ph.D., Post-Doc	Molecular Biology/ Biotechnology
Dr.M.Gulfraz	Professor	Ph. D. Post-Doc	Biochemistry/Natural Product Chemistry
Dr.GhazalaKakub Raja	Associate Professor	Ph. D. Post-Doc	Biochemistry/ Animal Biotechnology
Dr.M.JavaidAsad	Assistant Professor	Ph. D, Post-Doc	Industrial/Fermentation Biotechnology
Dr.M.Sheeraz Ahmad	Assistant Professor	Ph. D, Post-Doc	Biochemistry/Plant Biotechnology
Dr.Feroza H. Watoo	Assistant Professor	Ph. D., Post-Doc	Biochemistry /Nutrition Biotechnology
Dr.Pakeeza A. Shaiq	Assistant Professor	Ph.D.	Animal Biotechnology/Human Molecular genetics
Dr. Sadia Saeed	Assistant Professor	Ph.D.	Animal Biotechnology/Epigenetics
Dr.TayyabaZainab	Assistant Professor	Ph.D.	Molecular genetics
Ms. Hina Ali	Lecturer	M.Phil	Chemistry and Biochemistry

Standard 1-4**TABLE-4: PRESENT PERFORMANCE MEASURES FOR RESEARCH ACTIVITIES**

Faculty	Journal Publications (National & International) (Year 2014-2016)	Conference Publications (Proceedings/ Abstract) (Year 2014-2016)	On-going Projects (Year 2014-2016)
Prof. Dr. S.M. Saqlan Naqvi	12	06	2
Prof. Dr. M.Gulfraz	30	05	02
Dr. GhazalaKaukab Raja	11	07	02
Dr.M.JavaidAsad	08	02	-
Dr. M.Sheeraz Ahmad	07	04	1
Dr.Feroza H. Wattoo	08	02	-
Dr.Pakeeza A. Shaiq	06	02	1
Total	82	28	08

The UIBB is well established and its distinguishing feature is the availability of all expertise (Animal Biotechnology, Plant Biotechnology, Environment Biotechnology and Enzymology).

Community Services:

To enhance the quality and quantity of scientific trainings, the UIBB has organized the workshops and seminars. The basic aim is also to provide a forum for knowledge/information exchange between academic disciplines and raising general awareness about Biochemistry and Biotechnology. Under guidance of the Worthy Vice Chancellor, the department has established state of the art laboratory for food and water testing.

Faculty Satisfaction Regarding the Administrative Services:

- The department maintains a ratio of 25:1 and 2:8 for the student: teacher and technical: non-technical staff respectively.
- Administrative meetings (departmental, university, academic council, and syndicate) are attended and when required. Generally, two meetings of academic council are held per year. Board of studies of the department meets quarterly.
- Quick office disposal; no complaint pertaining to delay has ever been received from authorities.
- Proper records of individuals, students and their theses are maintained.

The institute is well established and its distinguishing feature is the availability of all expertise (Biochemistry, Molecular Biology, molecular genetics, Plant Biotechnology, Fermentation technology and Enzymology).

CRITERION-2: CURRICULUM DESIGN AND ORGANIZATION
Degree Title: M.Phil. (Biochemistry)

Intent:

Curriculum design and update is regularly initiated by the faculty members of the UIBB. After approval from Departmental Board of Studies comprised of senior faculty members and subject specialist from other faculties or from other Universities or research Institutions. The approved curriculum is then sent to Board of Faculty, headed by the Dean Faculty of Sciences. This Board consists of senior faculty members from all the Departments of the faculty and subject specialists. Finally the curriculum is presented before the Academic Council which is comprised of the Professors, Associate Professors, Faculty Representatives and very senior subject specialists.

Definition of Credit Hour:

A student must complete a definite number of credit hours. One credit hour is one hour theory lecture or two hours laboratory (practical) per week. One credit hour carries 20 marks. A semester is of 18 weeks. Presently following degrees are offered by UIBB:

Credit Hours					
Degrees	Min. Course Hrs	Thesis	Duration (in Semesters)		Passing CGPA
			Min	Max	
BS (Biochemistry)	132	-	8	10	2.50
BS (Microbiology)	132	-	8	10	2.50
M.Sc. (Biochemistry)	55	-	4	6	2.50
M.Phil. (Biochemistry)	30	10	4	6	2.50
M.Phil. (Biotechnology)	30	10	4	6	2.50
Ph.D. (Biochemistry)	18	50	8	10	3.00
Ph.D. (Biotechnology)	18	50	8	10	3.00

Pre-requisites

Minimum Academic Requirements:

A person holding M.Sc/BS Biochemistry degree from any recognized institute with CGPA of at least 2.50/4.00 OR with 45% marks under the Annual System is eligible to get admission in M.Phil Biochemistry. Must have passed university entrance test with 50% marks. The admission to the University is on merit which is determined by the aggregate of the academic performance (percentage of last degree marks) to university entrance test ratio of 60:40.

Degree Requirements:

A minimum of four semester's duration program with a total of 40 credit hours including 30 credits for course work and 10 credits for thesis/research (Not counted in CGPA). All students in M.Phil degree will be required to pass the Comprehensive Examination after qualifying the course work. Degrees are awarded after completing the required number of credit hours (courses). Minimum Grade Point Average for obtaining the degree is 2.50. To remain on the roll of the university, a student shall be required to maintain the following minimum GPA/CGPA in each semester

Semester	CGPA
First	1.50
Second	1.75
Third	2.00
Fourth	2.50

Examination & Weightage:

a) Theory

In course work, student's evaluation is done by mid-term examination, assignments/quizzes and final examination. A student, who misses the mid-term examination, is not allowed a make-up examination and is awarded zero marks in that examination. In case a student does not appear in the final examination of a course, he shall be deemed to have failed in that course. In theory, weightage to each component of examination is as prescribed here under:

Mid Examination	30%
Assignments	10%
Final Examination	60%

b) Practical

For practical examination (if applicable) 100% weightage is given to practical as scored final examination

Eligibility for Examination:

A student is eligible to sit for the examination provided that he/she has attended not less than 75% of the classes in theory and practical, separately. The minimum pass marks for each course are 40 % for M.Phil separately in theory & practical (if applicable).

Standard 2.1: Assessment of the Biochemistry M. Phil Curriculum

The assessment of curriculum is given in the following table and courses are crosstabulated according to the program outcomes.

TABLE-5 CURRICULUM VS PROGRAM OUTCOME

Course/Group of Courses	Outcomes		
	1	2	3
BCH-718,BCH-719,BCH-720I, BCH-720II, BCH-721,BCH-722,BCH-723, BCH-725,BCH-726,BCH-727,BCH-728,BCH-731,BCH-732,BCH-733,BCH-734,BCH-735,BCH-736	XXX	XXX	XX

x	=	Satisfactory
x x	=	Relevant & satisfactory
x x x	=	Very relevant & satisfactory
x x x x	=	Highly relevant & highly satisfactory

The curriculum fulfills and satisfies the core requirements for the program, as specified by the respective accreditation body and HEC.

Standard 2-2: Theoretical backgrounds, problem analysis, solution design given as under

TABLE 4.5 :Percentage of Elements in Courses

Theoretical backgrounds	Problem Analysis	Solution design
BCH-718, BCH – 722, BCH – 723, BCH – 725, BCH – 726, BCH – 727, BCH – 728, BCH – 731, BCH – 732, BCH – 733, BCH – 734, BCH – 735, BCH – 736	BCH – 719, BCH – 720I, BCH – 720II	BCH – 734, BCH – 719, BCH – 720I, BCH – 720II
Outcome = xxx	Outcome =xxx	Outcome=xxx

Standard 2-3: The curriculum must satisfy the core requirements for the program, as specified by the respective accreditation body

The curriculum satisfied core requirements for the programmes as specified by HEC.

Standard 2-4: The curriculum must satisfy the major requirements for the program as specified by HEC, the respective accreditation body /councils.

The curriculum satisfied major requirements for the programmes as specified by HEC.

Standard 2-5: The curriculum must satisfy general education, arts, and professional and other discipline requirements for the program, as specified by the respective accreditation body/council.

The curriculum satisfied general education requirements of programmes as specified by HEC.

Standard 2-6: Information technology component of the curriculum must be integrated Through-out the program

Information technology components of the curriculum has been applied by offering a course like Bioinformatics.

Standard 2-7: Enhancing Oral and Written Communication Skills of the Students

- Two seminars carrying one credit hour each at M.Phil level are compulsory to enhance their presentation skills.
- Students are assigned to present generally the recent status/ status on various global and local issues/problems.
- Special Problem course is offered to M.Phil students on specific titles (part of the course) which are submitted as written report, to increase their writing skills.
- Written synopsis based on their approved research title is compulsory which helps them to design, propose and write a research proposal.
- Write-up of M.Phil thesis and a research paper for a scientific journal further enhances the scientific writing skills of a student.

Criterion-3: Laboratories and Computer Facilities

There are research laboratories in the department. The facilities and shortcomings of these laboratories are listed as under;

1. Plant Biochemistry and Biotechnology Labs
2. Animal Biochemistry and Biotechnology Labs

3. General Biochemistry Labs
4. Enzymology and Industrial Biotechnology Labs
5. Bioinformatics Labs

- Location: UIBB, PMAS-AAUR
- Objectives: Laboratories are used for Research work for the graduate and post-graduate students. For implementing the projects funded by the University, HEC, PSF, PARC and other agencies.
- Shortcoming: Laboratories are reasonably equipped, spacious and adequate, however ACs are not installed in all labs.
- Safety Regulations: Fire extinguishers and first aid kits are available. The University also maintains a Medical Dispensary for such incidents.

The facilities and shortcomings of these laboratories are listed as under;

- Location: UIBB Building, ground Floor and Second Floor
- Objectives: Laboratories are used for conducting practical experiments related to their introductory and major courses.
- Safety Regulations: Fire extinguishers and first aid kits are available while Medical Dispensary for minor incidents is maintained in the University.

Standard 3-1: Laboratory Manuals

Laboratory manuals for each subject are available in their respective laboratory and with supervisors. Besides the faculty members also keep their personal books to prepare lessons.

Standard 3-2: Support/Laboratory Personal for Maintenance of Laboratory

One Lab Attendant is available to maintain laboratory chemicals/materials supplied, equipments, glassware, etc. Two laboratory attendants assist students in practicals, cleaning and washing.

Standard 3-3:

Computing and Infrastructure Facilities

- **Computing facilities support:** Most of the faculty members and the post graduate students have computer facility available. In addition, computers are also available in the Bioinformatics laboratory.
- **Shortcoming in computing infrastructure:** Wireless internet facilities in UIBB for faculty members, graduate/postgraduate students, research laboratories, and class rooms are not available.
- **Safety Arrangements:** Emergency exits and fire safety system in UIBB building are not available. There is also need for a security guard at the main gate of UIBB.

Criterion 4: Student Support and Advising

The University organizes support programs for students and provides information regarding admissions, scholarship schemes etc. The institute on its own has a faculty member in charge of student affairs while one faculty member is in charge of each degree program offered in UIBB. The institute also arranges orientation, study and re-creational guided tours of students. Director Students Affairs also arranges various cultural activities and solves the students's problems.

Standard 4-1: Frequency of Courses

- Courses are taught as per policy at the University/Academic Council.
- Elective courses are offered as per policy of HEC and the University.
- For post graduate programs, variety of courses are offered according to professional demand.

Standard 4-2: Structure of the Courses

Effective interactions between students, faculty and teaching assistants are ensured at the time of course formulation (both theoretical and practical aspects). Theoretical problems are explained and assignments are also given to the students whereas practical are carried out in the labs. Study tours to various research organizations are also organized to keep them updated on the latest developments in the area and to stimulate them for discussion through teacher/ student interaction.

Standard 4.3: Guidance to the students

Several steps have been taken to provide students guidance such as:

- Information about program requirements through UIBB head office.
- Personal communications via teachers-student meetings.
- In case of serious nature problems, Director Student Affairs, appointed by the university, helps students.
- Information regarding scholarships and job opportunities is available via Directorate of Student Resource Center.

Criterion-5: Process Control

It includes student admission, student registration and faculty recruitment activities which are dealt by various statutory bodies and the university administration.

Standard 5.1: Program Admission Criteria

- Process of admission is well established and followed as per rules and criteria set by HEC and University. For this purpose, an advertisement is published in the National News Papers and university website by the Registrar Office.
- Admission criteria for M.Phil in Biochemistry is M.Sc. (Biochemistry) or equivalent with CGPA not less than 2.5.
- Admission criteria are revised whenever needed.

Standard 5.2: Process of Registration

- The student file, after completion of admission process, is forwarded to the Registrar Office for proper registration in specific program and issuance of registration number.
- Registration is done one time only for each degree. In general, the students are registered on competition bases keeping in view the academic and research standards.
- Academic evaluation and promotion to next semester is done via mid-term and final exams with assignments/practical exams. The students then have to submit synopsis based on the research topics approved by the departmental Board of Studies (BoS) and approved/notified by the Directorate of Advanced Studies (DAS). They also need to pass the written and oral comprehensive exam conducted by the comprehensive exam committee. This is followed by laboratory-based research, thesis write-up/submission and viva voce exam conducted by an external examiner.

Standard 5.3: Recruiting Process for Faculty

Faculty recruitment policy followed by the University is as per rules recommended by HEC;

- Approved vacant/newly created positions are advertised in national newspapers, applications received by the Registrar office, call letters issued to the candidates short-

listed based on experience, qualification, publications and other qualities/activities as determined by the University.

- Candidates are interviewed for selection against a post by the University Selection Board and Vice Chancellor.
- Selection of candidates is approved by the Syndicate for issuing orders to join within a specified period.
- Induction of new candidates depends upon the number of approved vacancies.
- Tenure Track System (TTS) recommended by HEC has been adopted by the University.
- HEC also supports appointment of highly qualified members as foreign faculty Professors, National Professors and deputes them in concerned departments of the University.

Standard 5.4: Teaching and Delivery of Course Material

- To provide high quality teaching, department periodically revises the curriculum depending upon requirements, innovations and new technology.
- With the emergence of new fields, new courses are introduced, and included in the curriculum.
- Students usually buy cheap Asian editions of books published in advanced countries. These books are also available in the University library, where modest documentation, copying and internet facilities are available.
- Almost all the lectures are supplemented by multimedia, animations, videos etc.
- All efforts are made that the courses and knowledge imparted meet the objectives and outcome. The progress is regularly reviewed in the staff meetings.

Standard 5.5: Completion of Program Requirements

- The Controller of Examinations office announces dates of the commencement of examination and notifies the results of the exams. The evaluation procedure consists of quizzes, mid and final examinations, practicals, assignments/reports, oral and technical presentations. The minimum pass marks for each course is 40% for M.Phil degree.
- In theory, weightage to each component of examination is as prescribed here under:

Mid Examination	30%
Assignments	10%
Final Examination	60%

- Grade points are as follows

Marks obtained	Grade	Grade point	Remarks
80-100 %	A	4	Excellent
65-79 %	B	3	Good
50-64 %	C	2	Satisfactory
40-49 %	D	1	Pass
Below 40 %	F	0	Fail

- Gold medals are awarded to the M.Phil. students who secure highest marks. Degrees are awarded to the students on the annual convocation that is held every year.

CRITERION-6: FACULTY

Standard 6-1: There must be enough fulltime faculty members committed to the program to provide adequate coverage of the program areas/courses with continuity and stability. At present there is one Lecturer (on Contract), four Assistant Professors, two Associate Professors and Two Professors in UIBB for seven degree programs. Per statutes of UIBB, there is a need for the creation of new posts per requirements of each degree program being

offered, induction of qualified Faculty members on the vacant posts and promotion of existing faculty members to share the burden of teaching and research.

TABLE 4.6 FACULTY DISTRIBUTION BY PROGRAM AREAS IN UIBB

Program Area of Specialization	Number of Existing Faculty	PhD degree holders	MPhil degree Holder
Biochemistry	05	04	01
Biotechnology	04	04	0

Standard 6-2: The research interests and qualifications of all faculty member must be sufficient to teach courses being offered to different degree programs as well as to plan, modify and update courses and curricula.

Currently the interests of existing faculty members is not sufficient to meet the requirements of the courses taught to the M.Phil program.

Standard 6-3: All faculty members must have a level of competence that would normally be obtained through graduate work in the discipline. The majority of the faculty must hold a Ph.D in the discipline

At present all faculty members (except for lecturer, on contract) in Biochemistry are Ph.D degree holders in relevant discipline.

Standard 6-4: The majority of the faculty must hold a Ph.D in the Discipline

All regular faculty members are Ph.Ds except for three lecturers (under UIBB contract).

Standard 6-5: Dedicated faculty members, sufficient to research, are to remain in their current discipline

All members are dedicated to research, supervising M.Phil and PhD students, and conducting their funded research projects.

Standard 6-6: Their mechanisms in place for Faculty development

A mechanism is in place for Faculty development.

Standard 6-7: All faculty members should be motivated and have job satisfaction to excel in their profession.

- All faculty members are motivated by timely back up and appreciation by seniors. Avenues for research funding are provided through university research fund.
- Results of faculty survey employing Proforma-5 are summarized in graphical representations. The results showed satisfaction of the teachers over most of the parameters.

Criterion-7: Institutional Facilities

The institution must have the infrastructure to support new trends in learning such as e-learning including digital publications, library, video conference room and journals etc.

- **The library must possess an up-to-date technical collection relevant to the program and must be adequately staffed with professional personnel.**
Relevant textbooks of international editions and relevant staff are available
- **These aspects need to be strengthened in number and space.**
The facilities are regularly strengthened per requirement.
- **Classrooms must be air conditioned and adequately equipped with sound system and visuals.**
Classrooms are equipped with visuals.

- **Offices must be adequate to enable faculty to carry out their routine academic responsibilities.**

Offices are adequate & faculty carries out their routine academic responsibilities.

Standard 7-1: Infrastructure

The faculty has access to E-library which is very helpful for the high quality learning/education and access to scientific publications. The internet facility is also available to faculty members on campus which further strengthens scientific activities. However the department has the following shortcomings/problems:

- Internet services are provided by the university. Senior faculty members also have access to telephones which are also connected with the internet.
- Breach of power intermittently, due to which research and academic work both are suffered, however university has provided quite a reasonable back-up by local generator
- Drinking water facility is adequate for staff and students.
- Untrained supporting staff.
- Insufficient budget to meet with routine administrative and academic activities.
- Washrooms are inadequate for students and staff. Regular cleanliness of washrooms is not taken care of adequately.

Standard 7-2: Library Facilities

The University Central Library has wide range of books; however, journals and periodicals are limited. A small library with up-to-date editions of relevant books is maintained in UIBB institute.

Standard 7.3: Class-Room and Faculty Offices

Currently the classrooms are enough and multimedia are available for the lecture halls. Due to big size of classrooms and large number of students, there is urgent need for sound system in bigger halls. Lecture rooms also need to be air conditioned as the longer duration of summer season makes them unbearable for teachers and students. Practical lab space is adequate however not enough for increasing number of students. The heavy demands of chemicals/supplies of general laboratories are not covered by the existing budget. Not only are new and updated scientific equipments in urgent need but the repair and regular maintenance of existing laboratory facilities is in urgent demand. This severely affects the quality of teaching laboratory based practical courses and student learning. Faculty offices for existing members is available and provided to regular faculty members as well as to contract and IPFPs faculty members.

Criterion-8: Institutional Support

- **There must be sufficient support & financial resources to attract and retain high quality faculty and provide them means for to maintain competence as teachers and scholars.**

The institutional support is provided by the university however budget provision is insufficient.

The department at present avails all the human resources. The university administration has been struggling hard to strengthen all the departments, up-gradation of departments and establishing new faculties and Institutes.

Support and Financial Resources

- At present UIBB is having a very meager financial resource to maintain its present needs. The main support for departmental research activities has been earned through individual research grants won by faculty and indigenous scholarships by a few students. There is a dire need for increasing the allocated financial resources to strengthen academic and research activities.

Standard 8-2: High Quality Graduate Students and Research Scholars

Students are admitted in M.Phil once in a year. A strict merit policy is applied for admissions. A detail of the students enrolled during the past years is given in the following Table.

Table-5: ENROLLMENT FROM 2014-16

Degree Program	Year-Wise Enrollments		
	2014	2015	2016
M.Phil.	10	10	10

Standard 8-3: Financial Resources

Total budget of the department for financial year 2014-16 is only Rs. 55,000/- year which could only fulfill basic departmental needs. However, with the introduction of new degree programs and increase in the number of students, department is under huge pressure to provide chemicals for basic laboratories as well as for research students, regular repair/maintenance of infrastructure & equipments and books/journals/periodicals for the department library.

Summary

This Self Assessment Report (SAR) contains eight sections. The first section outlines the program mission and objectives. Section-2 provides information about the curriculum development. Section-3 enlists the laboratories and other relevant information. The last four sections provide information about student support, process control, faculty characteristics, institutional facilities and support provided by the university.

The program mission, objectives and outcomes are assessed, and strategic plans are presented to achieve the goal, which are again measurable through definite standards. Programme outcomes appeared to be highly relevant. The results of proforma no. 10 of 2014-16 show the scores of evaluations by students for all teachers of the Department of Biochemistry. The results of proforma no.1 presents the scores evaluation by the students for all courses offered by the Department of Biochemistry offered in 2014-16. The overall analysis based on proformas no. 1 & 10 clearly highlights that students were satisfied with the contents and teaching material of courses offered by the department as well as by the teaching abilities of course instructors.

The curriculum of M.Phil Biochemistry fully satisfies the core requirements for the programme as specified by the HEC. The information technology component of the curriculum has been applied by offering non-conventional courses like Bioinformatics. Curriculum design and update is regularly initiated by the faculty members of the Institute. After approval from Departmental Board of Studies comprised of senior faculty members and subject specialist from other faculties or from other Universities or research Institutions. The approved curriculum is then sent to Board of Faculty, headed by the Dean Faculty of Sciences. This Board consists of senior faculty members from all the Departments of the faculty and subject specialists. Finally, the curriculum is presented before the Academic Council which is comprised of the Professors, Associate Professors, Faculty Representatives and very senior subject specialists.

Infrastructure of the department is adequate for running M.Phil Biochemistry degree program. The classrooms and laboratories are reasonably equipped with adequate facilities. Institutional facilities were measured through Criterion 3; infrastructure and facilities, classrooms, faculty offices, computing facility support, shortcomings regarding funding and facilities in research laboratories and safety arrangements are highlighted. Institutional facilities for the upgradation and strengthening of existing laboratories facilities for quality research output are highly desired.

The process of admission is well established and followed as per rules and criteria set by HEC and the University. For this purpose, an advertisement is published in the National News Papers by the Registrar Office. As regards the process control covering admission, registration, recruiting policy, courses and delivery of material, academic requirements, performance and grading, university as well as Higher Education Commission have set forth appropriate rules, which are properly followed.

CONCLUSIONS

Following points are being considered based on the assessment of M.Phil Biochemistry program;

- 1 The faculty survey reveals that infrastructure still needs some upgradations like; air-conditioners in classrooms, general labs and some of the research labs; cleanliness of overall building and washrooms; regular repair and maintenance of building/everyday use items.
- 2 The annual budget for the department needs to be increased for the smooth conduct of academic and research activities.
- 3 The existing faculty number is far less as compared to the number of degree programs being offered and large number of under-graduate and post-graduate level students.
- 4 The UIBB is an isolated building with classrooms and research laboratories holding sophisticated equipments as well as accomodating huge number of students along with faculty and staff. Thus, there is dire need for the appointment of a security guard to ensure its safety.
- 5 In order to keep faculty member updated with latest research tools and techniques and to initiate/maintain productive scientific collaborations, regular foreign trainings are to be arranged.
- 6 Professional and behavioral training of the administrative and supporting staff for efficient handling of official activities.
- 7 Computers and internet facilities are available to all regular faculty members and post graduate students to boost the level of research and teaching.
- 8 The weakest point noted is the lack of quality time a faculty has for his/her personal research and family activities.

Result of Faculty Course Review

According to the result of the proforma No. 2, most of the faculty members pointed out that the assessment methodology set for theoretical courses is sufficient to evaluate the learning of students for a specified course. The criterion consists of multiple methods including regular discussions during lectures, hands-on practicals during lab sessions, thought provoking questions for assignments & quizzes, objective type paper pattern for mid-term, final and practical exams. Most of the teachers have consensus that the courses are up to date and set per HEC criteria, however course contents are regularly revised/updated when needed and new editions of books included.

Department	University Institute of Biochemistry and Biotechnology (UIBB)
Faculty	Sciences
Courses	Described earlier in SAR Assessment method as per University rules and regulations
Distribution of Grades/Marks	As per University rules and regulations
Overview/Evaluation (Course Co-coordinator's comments)	Satisfied
Students (Course evaluation survey)	Satisfied
External Examiner	NA
Student/Staff Consultative committee	N/A
Curriculum	In accordance with HEC guidelines
Assessment	Course objectives well defined and well achieved
Enhancement	Proposed changes in earlier course review report incorporated
Future changes	New and modern practical approaches may be incorporated if possible

Proforma No. 5: Results of Faculty Survey

According to proforma 5 of Faculty Survey regarding the satisfaction of the faculty. The survey has included multiple aspects such as balance of reseal, teaching and community services, intellectual stimulation of work, the type of teaching and research currently being undertaken, interaction with students and support received from colleagues, mentoring and administrative support available, clarity about faculty promotion process, the promotion aspects, job security, amount of time available for oneself and family and overall environment of the institute. Most of the faculty expressed above average satisfaction in all these aspects, as shown below graphically. The weakest aspect is the amount of time teachers find to interact with their families.

Amount of time you have for yourself and family**Whether department is utilizing your experience & knowledge****The overall climate at the department**

Annex-III**RESULTS OF GRADUATING STUDENTS SURVEY**

According to the results of Graduating Students Survey more than 70% student were of view that “The program is effective in enhancing team working abilities”, “the Program administration is effective in independent”, “The infrastructure of the Department was good”.

Proforma 7: ALUMNI SURVEY RESULTS

The graduates of Biochemistry join mostly research institutes, universities, hospitals, diagnostic laboratories.; Proforma 7 was sent to concerned institutes and overall feedback results of program assessment by the Alumni are presented in the following figure.

Survey of graduating students clearly indicates satisfaction of the graduates over the degree programs of the department. However, some students who showed dissatisfaction over the number of scholarships available

FACULTY RESUME

Name	PROF. DR. S. M. SAQLAN NAQVI

Name	DR. FEROZA HAMID WATTOO
Personal	Assistant Professor (BS-19) Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan.
Experience	2011-to date- Assistant Professor, University Institute of Biochemistry and Biotechnology, PMAS-Arid Agriculture University, Rawalpindi, Pakistan. 2009-2011 Assistant professor, Institute of Biochemistry, University of Sindh, Jamshoro. 2004-2009 Lecturer, Institute of Biochemistry, University of Sindh, Jamshoro, Pakistan. 2002-2004 Research Associate, Institute of Biochemistry, University of Sindh, Jamshoro,
Honor and Awards	1. Member, Board of Studies, Institute of Biochemistry, University of Sindh, Jamshoro 2. Member, Board of Faculty, University of Sindh, Jamshoro 3. Elected Associate Secretary, (Punjab-Chapter), (2013- to date), Pakistan Society for Biochemistry and Molecular Biology 4. Elected Executive Council Member, (2009-2011), Pakistan Society for Biochemistry and Molecular Biology 5. Elected Associate Secretary- (2007-2009), Pakistan Society for Biochemistry and Molecular Biology.
Memberships	1. Life Member, Pakistan Society for Biochemistry and Molecular Biology (PSBMB). 2. Life Member, The Chemical Society of Pakistan (CSP). 3. Member, Pakistan Proteomics Society (PPS). 4. Member, Nutritionatists Association of Pakistan (NAP).
Qualifications	Post Doc Agricultural Biochemistry, 2012, Iowa State University, Ames, Iowa 50011, USA Ph.D. Biochemistry, 2007 Institute of Biochemistry, University of Sindh, Jamshoro-Pakistan M.Phil. Biochemistry, 2002, Institute of Biochemistry, University of Sindh, Jamshoro-Pakistan M.Sc. Biochemistry, 1995 Dr.M.A.Kazi Institute of Chemistry, University of Sindh, Jamshoro. B.Sc. Chemistry, Zoology and Botany-1993, Govt. College Thatta, University of Sindh, Pakistan

Brief Statement of Research Interest	Food and Nutritional Chemistry, Bioanalytical and Environmental Chemistry, Biochemical Analysis of Medicinal Plants, Biotechnology and Bionanotechnology, Bioinorganic Chemistry, biochemical analysis in Food and Nutrition Chemistry, Hematology and Micro labs, Chromatographic methods of analysis in Biochemistry, Microplate reader, and Coulter counter techniques.

Name	DR. PAKEEZA ARZOO SHAIQ
<i>Personal</i>	Assistant Professor (BS-19) Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan.
<i>Experience</i>	1. Currently serving as Assistant Professor (BPS-19), Department of Biochemistry, PMAS-AAUR, Pakistan from June, 2014 2. Served as Lecturer (BPS-18), Department of Biochemistry, PMAS-AAUR from June, 2010-June, 2014.
<i>Honor and Awards</i>	1. Research trainee at Department of Immunology and Genetics, Rudbeck laboratories, Uppsala University, Uppsala, Sweden (2012). 2. Visiting Research Scholar at Psoriasis Genetics Laboratory, Department of Dermatology, University of Michigan, USA (2009-2010). 3. Got IRSIP (International Research Initiative program) fellowship for 6 months from HEC, Pakistan. 4. Got DEBRA scholarship for mutation analyses of EB patients at Salzburg, Austria (2009). 5. Got HEC Indigenous Scholarship for Ph. D. 6. Got Merit Scholarship (Teacher Assistantship) during Ph.D. course work. 7. Got 3rd position in college in B.Sc. examination. 8. Got 3rd position in college in SSC examination.
<i>Qualifications</i>	Ph.D. (BCH) 2010 PMAS.AAUR 4.00/4.00 M.Sc (BCH) 2004 PMAS.AAUR 3.47/4.00 B.Sc 2001 The University of Punjab 1 st Div HSSC 1999 FBISE, Islamabad 1 st Div SSC 1997 FBISE, Islamabad 1 st Div

Brief Statement of Research Interest	Molecular Genetics and expression analysis

<i>Name</i>	DR. TAYYABA ZAINAB
<i>Personal</i>	tayyaba.zainab@uaar.edu.pk Assistant Professor (BS-19) Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan.
<i>Experience</i>	Date of joining Jan 2015 to date, Assistant Professor PirMehr Ali Shah Arid Agriculture University Rawalpindi, Pakistan (PMAS-AAUR), Shamsabad, Murree Road, Rawalpindi
<i>Honor and Awards</i>	Gold Medal in MS Biosciences (CIIT) 2007 PhD Fellowship under Faculty Development Program, EUIBB, 2009-2013 PMAS-AAUR Bestway Foundation UK Scholarship for Pakistani PhD students 2013-2014
<i>Memberships</i>	• Member: Departmental Board of Studies, Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan (2015-present). • Member: Faculty Board, Faculty of Science, PMAS-Arid Agriculture University Rawalpindi, Pakistan (2015-present). • Curriculum Development: Development of Scheme of Studies of BS Biochemistry, BS Microbiology, M.Phil. and PhD Biotechnology, PMAS-AAUR (2016-present). • Member QEC Team and SAR Assessment Team: Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan (2016-present). • Focal person for PM laptops Scheme for Microbiology: University Institute of Biochemistry and Biotechnology, PMAS-Arid Agriculture University Rawalpindi, Pakistan (2016-present).
	Ph.D. and M.Phil. Thesis under Supervision (Member Supervisory Committee) 06 • Engineering of <i>Aspergillus fumigatus</i> β-glucosidase through site-directed mutagenesis. Sidrah Nazir (PhD Thesis) • Molecular mimicry between <i>Campylobacter jejuni</i> lipopolysaccharide and host gangliosides from patients of GBS in Pakistani population. Rashid Iqbal (PhD Thesis) • Inhibition of TGFBR signaling using natural compounds. AmmaraJabeen (PhD Thesis) • Modulation of trail mediated apoptosis in cancer cell lines through plant materials. Warda Ahmed (PhD Thesis) • Anthropometric, physiological, biochemical and micronutrients analysis in post cesarean females. Raesa Tabassum (MPhil) • Optimization of conditions for cell suspension culture of <i>Bistortaamplexicaulis</i>. Iftraj Nisar Yasin (MPhil)
<i>Brief Statement of Research Interest</i>	Molecular Genetics/Molecular Biology

Name	MS. HINA ALI
Personal	Lecturer (BS-18) Department of Biochemistry PMAS-Arid Agriculture University Rawalpindi, Pakistan. Nationality: Pakistani Email- hinaali@uaar.edu.pk
Experience 5 years	2015-Present Lecturer BPS-18, Department of Biochemistry, PMAS-Arid Agriculture University Rawalpindi, Pakistan. (12-02-2015 to Present) 2015- Present Production Manager, Mehr Mineral Water Plant, PMAS-Arid Agriculture University Rawalpindi, Pakistan. 2015- present Quality Control Research Lab activities, UIBB, PMAS-Arid Agriculture University Rawalpindi. Assigned responsibilities to coordinate and manage practical's in the respective fields along with the Marketing/Outreach/Production Assistance activities of University Research Product Display Centre (URPDC). 2013-2014 Bequivalent sciences centre, University of veterinary and animals sciences Lahore.
Honor and Awards	• Roll of honour (academic) in M. Phil Chemistry Lahore College for Women University (LCWU) • Appreciation Letter for Business Incubation Unit by training NIP Interns in field of biochemistry department • Certification of Appreciation as Judge in Islamabad science fair held by Intel Pakistan Corporation (IPC) • Certificate of IT equipment management skills Indigenous on campus training (IOT) under modern university governance program • Certificate of Project management skills indigenous on campus training (IOT) under modern university governance program • Certificate of Merit. Training course on Good Governance under indigenous on campus training under modern university governance program organized by HEC at PMAS Arid Agriculture University Rawalpindi. • Certificate of participation in quality assurance, indigenous on campus(IOT) program under modern university governance program in collaboration with HEC • Certificate of participation in workshop on atomic absorption spectroscopy held in LCWU. CO-Principal investigator in Research Project • Quality investigation into pilot scale wheat flour mill at PMAS-AAUR • Establishment of small scale poultry, slaughter and— processing unit at PMAS-AAUR

<i>Memberships</i>	
<i>Qualifications</i>	Master of Philosophy (MS/M.Phil) Lahore College for Women University, Lahore (2011-2013) Bachelors of Science BS(Hons) Government College University, Faisalabad (2006-2010) Intermediate (Pre-Medical) Government Degree College, Multan. (2004-2005) Matriculation (Science Subject) Govt. Girls High School Multan. (2003)
<i>Brief Statement of Research Interest</i>	➤ Phytochemistry ➤ Food Microbiology • Estimation, Classification, Separation and quantitative & qualitative analysis of antioxidant and phenolic compounds of edibles things, vegetables using, HPLC, UV/VIS Spectroscopy, LC and HPLC-MS • Determination of Quercetin and Flavonoids contents in all, root, coloured and green leafy vegetables and seasonal fruits. • Physiochemical (salts and minerals) and microbial analysis (mould, yeast, bacterial, <i>E.coli</i>, Total coliform and PCA) of portable drinking water and ground water by using different techniques.
<i>Publications</i>	1. Ali, H., N.Naz and M.Abbas. 2016. Quantitative analysis of Quercetin in pulps and peels of vegetables by using HPLC technique. Journal of Agricultural Research, 54(1):75-83
